The Challenge

The Digital Nightmare for Travelers

Every year, hundreds of thousands of independent travelers arrive in Nepal excited for adventure, but their dream trip quickly becomes a frustrating digital nightmare.

Fragmented Experience

Travelers juggle a dozen different apps and websites for hotels, buses, flights, and local information. This process is time-consuming, confusing, and riddled with uncertainty.

Critical Questions: Was that bus ticket legitimate? Where do I go next? What do I do next?

Annual Visitors to Nepal

Our Solution

Confidence in Every Journey

SajiloYatra replaces chaos with confidence. Starting with a live prototype focused on the Pokhara-Kathmandu region, we solve the most critical problem first: trusted lodging.

60-Second Booking

Users can find and book verified hotels in under 60 seconds through our streamlined process.

- ✓ Filter maps to see only verified hotels
- ✓ Real, verified photos and information
- ✓ Simple, seamless booking requests
- ✓ Ground-up vendor verification

"This is the app I wish I had on my last trip."
- User Testing Feedback

Our Roadmap

SPRINT 2 (Oct 29 – Nov 11)

- Finalize UI/UX polish
- Launch Bus Booking MVP (Kathmandu-Pokhara)
- Onboard first 50 verified hotels in Pokhara

SPRINT 3 (Nov 12 – Nov 25)

- Launch "Find a Local" feature
- Onboard first 10 pilot users
- Expand verified hotels to Kathmandu

Why Now? Perfect Timing

Post-pandemic travel is surging, and digital adoption in Nepal's tourism sector is accelerating. While global giants offer quantity, they lack local nuance and verification.

Join Our Journey

We are seeking collaboration to accelerate our progress and transform travel in Nepal.
